

# Project Proposal: ZEN G WORLD

## 1. Project Overview

ZEN G WORLD is a next-generation **Entertainment & Creator Economy Platform** uniquely tailored for the **Indian market**. It seamlessly integrates the best features of popular platforms like **Instagram (Reels)**, **YouTube (OTT)**, **Twitch (Gaming)**, and **TikTok** into a **single unified ecosystem**, offering a comprehensive digital entertainment experience.

## 2. The Vision

Our goal is to build a **"Super App" for digital entertainment** where users can:

- **Consume:** Enjoy Shorts, Long-form Videos, and Live Streams all in one place.
- **Create:** Effortlessly upload content via Web or Mobile.
- **Monetize:** Earn through a unique virtual currency called **"Zen G Coins"** and real money from views and gifts.
- **Socialize:** Connect with a vibrant community of creators and fans.

## 3. Target Audience

ZEN G WORLD is designed to serve:

- **Gen Z & Content Creators** seeking better monetization alternatives to YouTube and Instagram.
- **Gamers** interested in streaming esports and participating in tournaments.
- **Regional Audiences** with support for multiple Indian languages like Hindi, Tamil, and more.

## 4. Key Features

### A. The Ecosystem (Web Portal)

- **Dashboard:** Displays earnings (Zen G Coin balance), analytics (views, subscribers), and quick navigation.
- **Shorts (Reels):** Vertical 9:16 videos with TikTok-style snap scrolling, real-time CSS filters (Sepia, Grayscale), webcam recording, and social interaction tools (likes, comments, shares, music disc).
- **OTT (Long Video):** Horizontal 16:9 video player with categorized content (Entertainment, Gaming, Music, Education) and a hero banner showcasing featured content.
- **Gaming (Esports):** Live tournament streams, match listings (live/upcoming), and a curated game library.
- **Community:** Creator discovery network, personalized "Who to Follow" suggestions, all wrapped in a sleek glassmorphism UI for a modern look.

- **Creator Studio (Upload):** Dual-mode upload for Shorts or Long Videos with smart aspect ratio detection and metadata management (title, description, category, thumbnail, visibility).
- **Profile:** User stats (followers, views), editable details, and wallet balance display.

## 5. Technology Stack

- **Frontend (The Face)**
  - Framework: React.js
  - Routing: React Router DOM
  - Styling: CSS3 (Flexbox, Grid, Glassmorphism, Animations)
  - State Management: React Hooks (useState, useEffect)
- **Backend (The Brain)**
  - Framework: Java Spring Boot
  - Language: Java 17
  - Build Tool: Maven
  - Security: Planned Spring Security with JWT
- **Database (The Memory)**
  - Platform: Supabase (PostgreSQL - Free Tier)
  - Structure: Users and Videos tables
- **Deployment (Zero Cost)**
  - Backend: Render.com
  - Frontend: Vercel
  - Database: Supabase

## 6. Unique Selling Points (USP)

- **Zen G Coins:** A unified currency rewarding engagement across all content types (Shorts, OTT, Gaming).
- **Creator-First Design:** Upload interface optimized for both mobile (vertical videos) and desktop (horizontal videos).
- **All-in-One Platform:** Users can watch shorts, stream games, and enjoy movies without switching apps.

## 7. Future Roadmap

- **Phase 1 (Current):** Web Portal MVP completed.
- **Phase 2:** Connect database to save real videos and user data.
- **Phase 3:** Launch Mobile App using React Native.
- **Phase 4:** Implement Live Streaming with WebRTC.
- **Phase 5:** Integrate AI for auto-captions and personalized content recommendations.

---

**Developer:** Suvam

**Status:** MVP Complete (Web Portal)

**Version:** 1.0

---

ZEN G WORLD aims to revolutionize digital entertainment in India by providing a powerful, user-friendly platform that empowers creators and delights audiences with diverse content all under one roof.
